## ABOUT US

Leo & Leo Apparel Prints is India's one of the pioneering companies since 2017 and contending in this fierce market marvelously by the in-depth business dexterity. We are a sole proprietor based entity, headquartered at Velampalayam, Tiruppur, Tamil Nadu. By the support of our professionals, we are engaged in manufacturing a superb quality assortment of products includes Men's Shirt, Ladies Sublimation Top, Sublimation Bed Sheet, Cotton T-Shirt, Home Textiles and more. The squad of our venture is committed to purveying products that not only satisfy customer needs but also add value to the equipment investment by minimizing costs, improving productivity, ensuring reliability and emphasizing food safety. The entity strives to enable its customers in upgrading their businesses by positively impacting the way they attempt to achieve their own great purposes. In addition, our professionals are specialized in rendering Printing Service.

## How We Do It

### Step 01

#### Concept & Research

This consists of basic sketches around your product idea. So ask yourself what is your product and how is your product going to be used? It is vital to research the current markets and demands. So you need to find out what is already on the market what is similar to your product idea? If there is a similar product, how is yours going to be better?

#### Design & Development

Using the information you have gathered from your research you can now develop your product designs. This is the final tweaks to your drawings with dimensions and material selection so when you progress to the next step, you have a detailed drawing/Art form/Structure to work from.

### Step 02

### Step 03

#### Prototype/Sampling

Once our concept is finalised, we develop a Prototype/sampling and check for various aspects to ensure that the sample is usable from a design & functionality standpoint. This is the point where we may have to go back to the drawing board when we test our prototype to ensure it can be produced.

#### Final Production

Once the Prototype/Dummy Sample is approved and the client is happy with the output of the Product, a physical sign off is taken by the client to process the same for Final Production and manufacturing. During this time, we also do our Final Quality check to ensure that all the measures have been taken to process for Final Production.

### Step 04

# Machine

## Sublimation Roll To Roll Fushing Machine

- ▶ Sublimation digital printing
- ▶ (Accurate printing)
- ▶ (Affordable prices )(15000 meters in a day)

## Cotton DTG Placement Machine

- ▶ Cotton digital (bit format DTG)
- ▶ Apparels Home textiles, Shoes, Gaps, Leather,
- ▶ 5000 pcs white & dark ground cotton DTG placement machine

# Machine

## Cotton Roll To Roll Machine

- Cotton digital printing
- (Roll to Roll )(Unlimited colours)
- (Unlimited designs)(Eco friendly)
- (Excellent fastness results)
- (5000 meters in a day)
